Radio H.F. Internet Newsletter

Volume 16, Number 10

October 2014

PDF created by the Digital Library of Amateur Radio & Communications from the original plain-text edition.

October 8, 2014 / le 8 d’octobre, 2014

Welcome to the October 2014 edition of the Radio H.F. Internet Newsletter.

Bienvenue a l'édition d’octobre 2014 de "Radio H.F. Internet Newsletter".

Sheldon Harvey
Owner, Radio H.F.
Editor/Publisher, Radio H.F. Internet Newsletter

THE RADIO H.F. INTERNET NEWSLETTER
VOLUME 16 NUMBER 010 – OCTOBER/OCTOBRE 2014

Edited and Distributed by Sheldon Harvey
Greenfield Park, Quebec, Canada
Copyright 2014 Radio H.F. Publications

E-MAIL: hfnewsletter@yahoo.com mailto:hfnewsletter@yahoo.com
Please visit the Radio HF web page at: http://www.radiohf.ca http://www.radiohf.ca/

The Radio HF Internet Newsletter is distributed monthly, free of charge, to subscribers by e-mail. The Newsletter is a collection of web sites specifically related to radio (AM/FM, shortwave, Internet radio, amateur radio, scanning and CB), communications, telecommunications, radio memorabilia and collectibles, media, journalism, science, technology, space and astronomy, weather, transportation, plus some fun things thrown in for good measure! Each edition includes links to web sites submitted by subscribers or by the editor. All sites are reviewed, verified and presented to you, with the URL, and a brief description of each site.

The Newsletter arrives in your in-box as an easy to read e-mail; no complicated attachments, and no fear of viruses. The Newsletter is distributed to over 1500 subscribers. The subscriber list is secure, private and confidential. It will never be sold, redistributed or displayed.

Subscribers are encouraged to send along web sites for inclusion in future editions of the Newsletter. All contributors whose sites are published will receive a 2% discount on their next purchase from Radio H.F. The e-mail address for all contributions, comments, and subscription requests is hfnewsletter@yahoo.com mailto:hfnewsletter@yahoo.com

Archived editions from May 2005 to the most recent may be found at:

DISCLAIMER: The contents of web sites featured in this newsletter do not necessarily represent those of the editor, or the contributor, unless specifically noted. The editor reserves the right to refuse publication of any website link submitted by a subscriber should the editor deem the site inappropriate for the Newsletter.

To remove yourself from the distribution list of this newsletter, simply contact me by e-mail.

Welcome to the October issue the Radio HF Newsletter. Shorter daylight hours are upon us and the leaves are turning colour and falling here in the Montreal region. It's a great time of the year though; an excellent time for getting out and enjoying the fall weather and mild temperatures. But don't be fooled. We all know what's not far off on the horizon. Many of our amateur radio friends are busy at this time of the year shoring up their antennas for the winter months ahead. Radio conditions tend to improve around this time of the year as well as the high static levels tend to drop off with a decrease in the atmosphere of humidity and lightning. Reception conditions in general are better as we head into the fall and winter period. If you're starting to spend more time indoors, some of that time no doubt at your computer, please remember to send along the links to any interesting web sites that you might come across that you think will be of interest to our readers.

Happy Columbus Day to all of our American friends

Our Monthly Special Zone for October features web pages on German American Heritage Month & Day, National Breast Cancer Awareness Month, World Rainforest Week, World Mental Health Day, World Food Day, United Nations Day, and Halloween.

This month's virtual voyage around the world, in the "Where in the World Zone", takes us to a spot on the globe very much in the news…Hong Kong. Officially known as Hong Kong Special Administrative Region of the People's Republic of China, it is an autonomous region on the southern coast of China geographically enclosed by the Pearl River Delta and South China Sea. Hong Kong is known for its expansive skyline and deep natural harbour, and with a land mass of 1,104 km2 (426 sq mi) and a population of over seven million people. It is one of the most densely populated areas in the world.

Let's get on to this month's links. Please consider taking a few minutes to submit some interesting websites that you visit during your travels on the Internet that you think our readers might find helpful.

RADIO H.F. PUBLICITY ZONE #1

NEW FROM YAESU

FT1DR C4FM 144/430 MHz Dual Band Digital Handheld Transceiver

The introduction of our FT1DR 12.5 kHz C4FM/FDMA 144/430MHz Dual Band Digital Handheld Transceiver ushers in The Dawn of a New Digital Communications Era in Amateur Radio. Yaesu has introduced the DR-1 Digital Repeater and FTM-400DR Mobile Transceiver products to work with the FT1DR to provide efficient and large data handling capabilities not currently available on the Amateur Radio bands.
The most attractive benefit of digital communication is its ability to transfer large amounts of data. The new FT1DR uses 12.5 kHz C4FM FDMA digital modulation mode to enable high speed data communication capability, reliable voice communication with strong error correction performance. C4FM FDMA provides 9.6 kbps data baud rate speed. It is significantly different from existing digital Amateur Radio and expands the opportunities for Amateur radio operators' activities in the future.
The new FT1DR provides three digital modes (V/D mode, Voice FR mode, Data FR mode) and a Analog mode.

For complete details including specifications on the FT1DR please visit the following Yaesu webpage:
http://tinyurl.com/n6m98n5 http://tinyurl.com/n6m98n5

Yaesu products are available from Radio HF. Please contact Radio HF for complete details on ordering and pricing.

THE WCBS GALLERY

http://donswaim.com/wcbsgallery.html http://donswaim.com/wcbsgallery.html

VIA John Fisher, N. Chelmsford, Massachusetts

Here’s an interesting site I stumbled on. The site, in their words, is WCBS artifacts, ads, pictures and kitsch. It's a fun site. The station is WCBS Newstalk Radio 880 in New York City.

PROJECT DIANA

http://www.ieeeghn.org/wiki/index.php/Project_Diana
http://www.ieeeghn.org/wiki/index.php/Project_Diana

VIA Sheldon Harvey, Greenfield Park, Quebec

Learn about Project Diana, mankind’s first attempts at reaching beyond the ionosphere and the United State’s first foray into space. Historians often point to Project Diana as the beginning of the United States’ space program, and mankind’s first reach beyond the ionosphere to make contact with a non-terrestrial object.

DESIGNATIONS OF U.S. MILITARY ELECTRONIC AND COMMUNICATIONS EQUIPMENT

http://www.designation-systems.net/usmilav/electronics.html
http://www.designation-systems.net/usmilav/electronics.html

VIA Sheldon Harvey, Greenfield Park, Quebec

Soon after radio came in use at the beginning of the 20th century, Army and Navy started to use this new means of communication. Both services also assigned formalized designations to its radio and communications equipment almost from the beginning. These systems, however, proved cumbersome and difficult to adapt to new requirements. The expansion of World War II, and the introduction of new types of equipment (e.g. radar) finally lead to the joint "AN" designation system for all types of electronic and communications equipment. This article will describe the various designation systems in some detail.

HAM RADIO SECRETS

http://www.hamradiosecrets.com/index.html http://www.hamradiosecrets.com/index.html

VIA Sheldon Harvey, Greenfield Park, Quebec

This catch-all site for amateur radio is created and updated by Claude Jollet, VE2DPE, a ham operator from Quebec. This amateur radio Web site will help you find the basic information you need to get started on your journey toward obtaining your amateur radio operator license; Improve your knowledge of the essential aspects; and discover the many new features of the "king of hobbies"

RADIO WAVES BELOW 22 KHZ

RADIO H.F. BOOK REVIEW ZONE

EDITOR: T. J. "Skip" Arey

Arduino for Ham Radio
by Glen Popiel KW5GP
ISBN: 978-1-62595-016-1
Published by: The American Radio Relay League
$34.95 US or $38.50 Canadian - Order # 0161
ARRL
225 Main Street
Newington, CT, 06111-1494 USA
Tel: 1-860-594-0200 Fax:1-860-594-0259
hq@arrl.org mailto:hq@arrl.org

If you are living in a cave somewhere and are completely out of touch with technology today, you may not have heard of the Arduino Microcontroller.
More likely, you have heard of the Aurdino Microcontroller but you are scratching your head about how to make use of it, especially in amateur radio applications. Well you can stop scratching because ARRL Publications has come out with a book that will not only answer all your questions but get you building useful tools for your ham shack.
The Arduino for Ham Radio text provides a sound foundation in the basics of open source microcontrollers, covering both the hardware (very inexpensive) and software (totally free). It walks you through the maze of variations of Aurdino boards and "Shields", boards you add to make the microcontroller do more real world activities. The author takes a step by step approach to allow the reader to advance at their own level of comfort. Once your mind is right about the basic system and construction techniques, the book offers over a dozen ham radio specific applications that can greatly enhance the operational capability of your operating

position.
Almost every application shown in the book can be further modified and developed through following the many online communities dedicated to this cool tool. Further, you will no doubt develop enough expertise that you may come up with some of your own ideas. Don’t forget to share them with your friends.
The cover price of this book is actually more than the cost of most Aurdino boards. However, in terms on knowledge transfer, this book would be cheap at twice the price. If you want in on the latest trend in the radio hobby, you need to add this book to your library!

This publication is available from ARRL or from your favourite radio and communications publications retailer, including Radio HF (ed.)

RADIO H.F. PUBLICITY ZONE #3

What is new in books & publications from the American Radio Relay League, the Radio Society of Great Britain, and other publishers?

ARRL Handbook (2015 Hardcover Edition)
The ARRL Handbook is widely used by radio amateurs as a reliable and highly-respected guide to station design, construction, modification, and repair. Introduced in 1926 as the Radio Amateur's Handbook, each edition has remained true to this publishing legacy: a concise source of reference and information for applied radio electronics and experimentation. Chapter by chapter, you will discover the theory, practical information and construction details to expand your knowledge and skill as an Amateur Radio operator and experimenter.
This ninety-second edition of The Handbook is at the forefront of the growing field of wireless telecommunications. The book covers not only the fundamentals of radio electronics—analog and digital—but also practical circuit and antenna design, computer-aided design, digital operating modes, equipment troubleshooting, and reducing RF interference. Many projects and construction articles are included to help enhance your station and expand your participation as an active radio experimenter. Practical applications and solutions make The ARRL Handbook a must-have for hobbyists and technical professionals, finding its way onto workbenches, operating desks, and into university libraries and classrooms.
New Information
Updated material on the state of Solar Cycle 24
Recommended parts for modifying circuit designs and fine-tuning performance
A package of useful applications on CD-ROM from Tonne Software, including a new version of the ELSIE™ filter design program
Annual transceiver model review
CD-ROM Included! The CD-ROM includes all of the fully searchable text and illustrations in the printed book, as well as expanded supplemental content, software, PC board templates and other support files.
System Requirements: Windows® 7, Windows Vista®, or Windows® XP, as well as Macintosh® systems, using Adobe® Acrobat® Reader® software. The Acrobat Reader is a free download at www.adobe.com. PDF files are Linux readable.
